Developmental Classes Descriptions

Sensory Fundamentals (5 months-Walking): As your child begins to gain a little more independence & ability to explore his or her environment, sensory & motor development is increasing exponentially. This class provides a chance for your baby to use those new movements alongside other babies to socialize, create more advanced sensory motor connections and obtain home exercises to continue progressing through normal developmental stages.

Signing Fundamentals (6 months-2 years): Looking for a way to help your baby/child communicate prior to him/her being able to speak? Our Signing Fundamentals class incorporates techniques to elicit language and build receptive and expressive language skills. Teaching sign language helps children as young as six months old to communicate their needs and express their feelings. This class is led by a Speech Language Pathologist.
